New York, USA (Open to Relocate) | +1 (646) 305-2448 | kishanpatel.da01@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Data Analyst with around 5 years of experience leveraging Data Analytics, AI, Generative AI, and Machine Learning to transform complex datasets into actionable business insights across telecom, insurance, and enterprise domains. Expertise in SQL, Python, Power BI, Tableau, Azure, AWS, Snowflake, Databricks, predictive modeling, statistical analysis, cohort analysis, NLP, and data visualization. Proven track record of building analytics solutions, forecasting models, AI-driven insights, and automated reporting frameworks that improve decision-making, operational efficiency, and business performance.

WORK EXPERIENCE

Hartford Financial Services Group, USA

October 2025 – Present

Data Analyst

- Engineered Python and SQL-based analytics pipelines on AWS Lambda and DynamoDB to process 15M+ insurance policy, claims, and customer records, reducing reporting cycle time by 45% and improving data accuracy by 30%.
- Developed statistical modeling and time-series forecasting solutions to predict claim volumes, loss trends, and policy renewal patterns, improving forecast precision by 22% and supporting actuarial and underwriting decision-making.
- Performed cohort analysis on policyholder behavior, retention, and claims activity across commercial and personal insurance portfolios, identifying risk segments that increased customer retention by 18%.
- Automated enterprise Tableau dashboards and KPI scorecards using SSMS and Python, enabling real-time visibility into underwriting performance, claims processing efficiency, and premium growth metrics for 100+ business users.
- Implemented Generative AI-powered data exploration and reporting workflows using Python-based LLM integrations, reducing ad hoc analysis effort by 35% and accelerating insights delivery for business and operations teams.
- Governed data quality, data wrangling, and regulatory compliance initiatives across insurance datasets, resolving 95% of critical data anomalies while managing delivery milestones, requirements, and defect tracking through JIRA.

Reliance Industries LTD - Manager, India

July 2022 – August 2024

Data Analyst

- Analyzed 50M+ operational records using SQL, SQL Server, and Amazon Redshift, improving capacity planning accuracy by 28% and optimizing resource allocation across regional operations.
- Executed A/B testing and hypothesis testing frameworks for digital service enhancements and customer engagement initiatives, increasing feature adoption rates by 19% while validating business impact with 95% confidence levels.
- Investigated root causes of critical network slowdowns and service degradation events by correlating performance, traffic, and operational data, reducing incident resolution time by 35% and improving network availability by 12%.
- Developed predictive modeling solutions using Python and Keras to forecast network demand, subscriber growth, and infrastructure utilization, improving forecast accuracy by 24% and supporting strategic expansion planning.
- Built NLP-driven analytics workflows to process customer feedback, support tickets, and service interactions, uncovering key service quality issues that contributed to a 17% improvement in customer satisfaction metrics.
- Implemented cohort analysis and recommendation models to improve user engagement by 21%, while developing executive dashboards in Looker and automating ETL workflows through SSIS for enterprise reporting.

Hexaware Technologies, India

September 2020 – June 2022

Junior Data Analyst

- Processed and evaluated 8M+ records using Python, Pandas, NumPy, and MySQL, performing data cleaning, transformation, and integration activities that improved data quality by 30% and reduced reporting discrepancies.
- Conducted exploratory data analysis (EDA) and trend analysis on customer, operational, and business datasets, identifying key performance drivers that supported a 15% improvement in operational efficiency.
- Built and maintained scalable data pipelines using Azure Data Lake, Azure Databricks, and Snowflake, reducing data processing time by 35% and improving accessibility for analytics teams.
- Developed machine learning models using Scikit-learn, including Decision Trees, Random Forests, and Support Vector Machines, increasing prediction accuracy by 22% for business forecasting and customer segmentation initiatives.
- Created interactive Power BI dashboards and automated Advanced Excel reports using Pivot Tables, Power Query, VBA, and Lookup functions, reducing manual reporting effort by 40% and enabling real-time KPI monitoring.
- Collaborated with cross-functional teams using GitHub and Confluence to document data requirements, track analytical deliverables, and support enterprise reporting projects, contributing to 98% on-time project completion.

PROJECTS

Enterprise Analytics & Fraud Detection Platform

- Orchestrated an end-to-end analytics system covering fraud detection, financial assessment, sales forecasting, and pricing strategy, integrating data from 8 distinct sources.
- Engineered machine learning models like Logistic Regression, Random Forest, and Gradient Boosting, reducing false positives in fraud detection by 15% and improving alert precision by 10%.
- Generated actionable insights that reduced analysis turnaround time by 30%, improving overall reporting efficiency and decision-making speed.
- Performed statistical analysis, including regression modeling and hypothesis testing, to validate model performance and ensure analytical accuracy across all 8 integrated data sources, leveraging Google BigQuery for scalable data processing.

Data Visualization Dashboards – Looker Studio & Excel

- Built interactive dashboards in Looker Studio and Excel to analyze sales trends and regional performance, improving conversion rates by 15%.
- Integrated and transformed raw data using calculated fields and Excel functions, reducing service turnaround time by 8–10% and cutting manual reporting effort by 40–50%.

Exploratory Data Analysis & Time-Series Forecasting – Python

- Performed EDA and applied statistical analysis and modeling using Python on real-world datasets, identifying a drop-off at a specific funnel stage and contributing to a 15% improvement in lead conversion rates.
- Analyzed 10+ years of historical stock data using Python to identify market trends and patterns, improving entry/exit strategies by 12% and reducing data processing time by 25%.

Google BigQuery & Cloud Analytics — Python & BigQuery

- Built and deployed end-to-end data pipelines using Google BigQuery to process and analyze large-scale datasets, enabling real-time reporting and business insights.
- Designed optimized SQL queries in BigQuery to aggregate and transform data across multiple tables, reducing query execution time by 35%
- Developed interactive dashboards connected to BigQuery data sources using Looker, delivering actionable KPIs to business stakeholders.

SKILLS

Programming & IDEs: Python, R, SQL, NoSQL, Jupyter Notebook, Visual Studio Code
Data Processing & Cloud Tools: Pandas, NumPy, SSIS, AWS (Lambda, DynamoDB, IAM, Redshift), Azure (Data Lake, Databricks), Snowflake, GCP(BigQuery)
Machine Learning & AI: Scikit-learn, TensorFlow, Keras, NLP, Generative AI, Predictive Modeling, Recommendation Systems
Statistical & Analytical Methods: Regression Analysis, Decision Trees, Random Forests, Support Vector Machines, Statistical Modeling, Hypothesis Testing, A/B Testing, Cohort Analysis, Time-Series Forecasting, Trend Analysis
Visualization & BI Tools: Tableau, Power BI (with Copilot AI), Looker, Advanced Excel (Pivot Tables, Power Query, VBA, Lookups)
Databases & Data Management: MySQL, SQL Server, MongoDB, SQL Server Management Studio
Version Control & Collaboration: Git, GitHub, JIRA, Confluence, Slack
Core Data Skills: Data Cleaning, Data Transformation, Data Integration, Data Warehousing, Data Governance, Data Wrangling

EDUCATION

Masters in Data Analytics & Strategic Business Intelligence	May 2026
<i>Long Island University, Brooklyn, NY</i>	<i>GPA: 3.90 / 4.00</i>
Bachelor's in Electronics & Communication Engineering	June 2018 - June 2022
<i>Vishwakarma Government Engineering College, India</i>	<i>GPA: 3.55/4.00</i>

CERTIFICATIONS

Microsoft Power Platform
Azure Fundamentals
AWS Cloud Security Foundations
Google Data Analytics (Coursera)
